

InVision Studio

Part of the larger InVision range of noise-reducing microphone shock-mounts, the Rycote InVision Studio suspensions have been designed for discreet, low-profile use in broadcast studio environments where windshielding is not required.

The InVision Studio mounts feature the latest Lyre suspension systems to offer professionals the cleanest possible sound, free from unwanted cable or stand-borne noise.

Studio & Live Sound

InVision Universal Studio Mount

The **InVision Universal Studio Mount (USM)**, is the latest addition to the Rycote InVision range of microphone shock-mounts, and is designed to accommodate any large-diaphragm side-address microphone from 18 to 68 mm in diameter (depending on the model).

Using the Lyre technology, the USM can offer up to 12dB better attenuation of unwanted vibrations – that’s four times in terms of sound pressure level – compared to many conventional “cat’s cradle” elasticated microphone mounts. Stand and cable-borne noise just disappears.

The **InVision Studio Kit** is a complete suspension and pop filter system, which combines the Universal Studio Mount (USM) with a new Universal Pop Filter to make a complete vocal microphone suspension and pop filter system that will accommodate virtually any microphone.

InVision Studio	Part no	Suitable for mic with:
InVision USM	044901	Diameter: 18-55mm Max weight for horizontal use: 500g Max weight for vertical use: 750g
InVision USM Studio Kit	045002	
InVision USM-L	044903	Diameter: 18-55mm Max weight for horizontal use: 250g Max weight for vertical use: 750g
InVision USM-L Studio Kit	045003	
InVision USM-VB	044912	Diameter: 55-68 mm Max weight for horizontal use: 500g Max weight for vertical use: 900g
InVision USM-VB Studio Kit	045005	
InVision Universal Pop Filter	045001	6" vocal pop shield with universal suspension clamp

InVision Stereo Pair Kit

The **InVision Stereo Pair Kit** comprises two vibration-reducing Lyre suspensions mounted on a rigid, slotted stereo bar.

The dual InVision INV-7 HG MkIII Lyre webs used in the **Stereo Pair Kit** can accommodate larger shotgun mics from 19 to 25mm in diameter, and up to 300mm long. The spacing between the two webs, and thus between the two mounted microphones, is quickly and simply adjustable from 40 to 200mm.

InVision 7 Pop Filter Kit

The **InVision Pop Filter Kit** includes an InVision INV-7 suspension based on two patented Lyre webs, which will accommodate shotgun mics from 19 to 25mm in diameter, and provides broadcast professionals with the cleanest possible sound, free from unwanted cable- or stand-borne noise. The suspension is combined with the Pop Filter, allowing the mic to be used for voiceover or dialogue replacement work in studio.

Table Stand & InVision

The **Table Stand** is 70mm round, has a non-slip base, and features a 3/8-inch screw thread into which Rycote microphone suspensions, audio recorder suspensions or clips fitted with small-diaphragm or shotgun microphones up to 250mm long may be attached. It is sold separately, or together with a suitable Rycote InVision INV-7 HG MkIII Lyre mount if required. This optional mount holds microphones from 19 to 25mm in diameter, and will securely hold microphones of up to 250mm in length when mounted in the Table Stand.

As always, the Rycote Lyre webs decouples a mounted microphone extremely efficiently from the Table Stand, resulting in the minimum of vibrations (and thus unwanted noise) being passed to the mic capsule.
